
Supporting Laboratory Systems Strengthening

Identified Challenge

Countries **regularly** undertake various readiness and system maturity assessments...

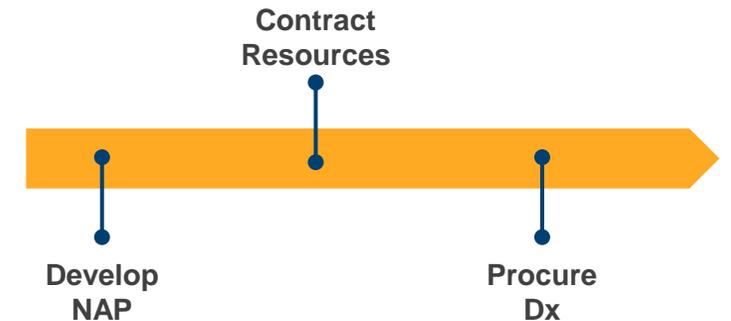

- **LABNET Assessment**
- **GHSA Survey**
- **Joint External Evaluation (WHO)**
- **WHO AFRO Survey**
- **Health Facility Assessments (HFAs)**
- **Program Reviews**

Identifying limitations of national laboratory infrastructure...

? **Output:** What needs to be implemented to achieve the next level of functionality of each core capability?

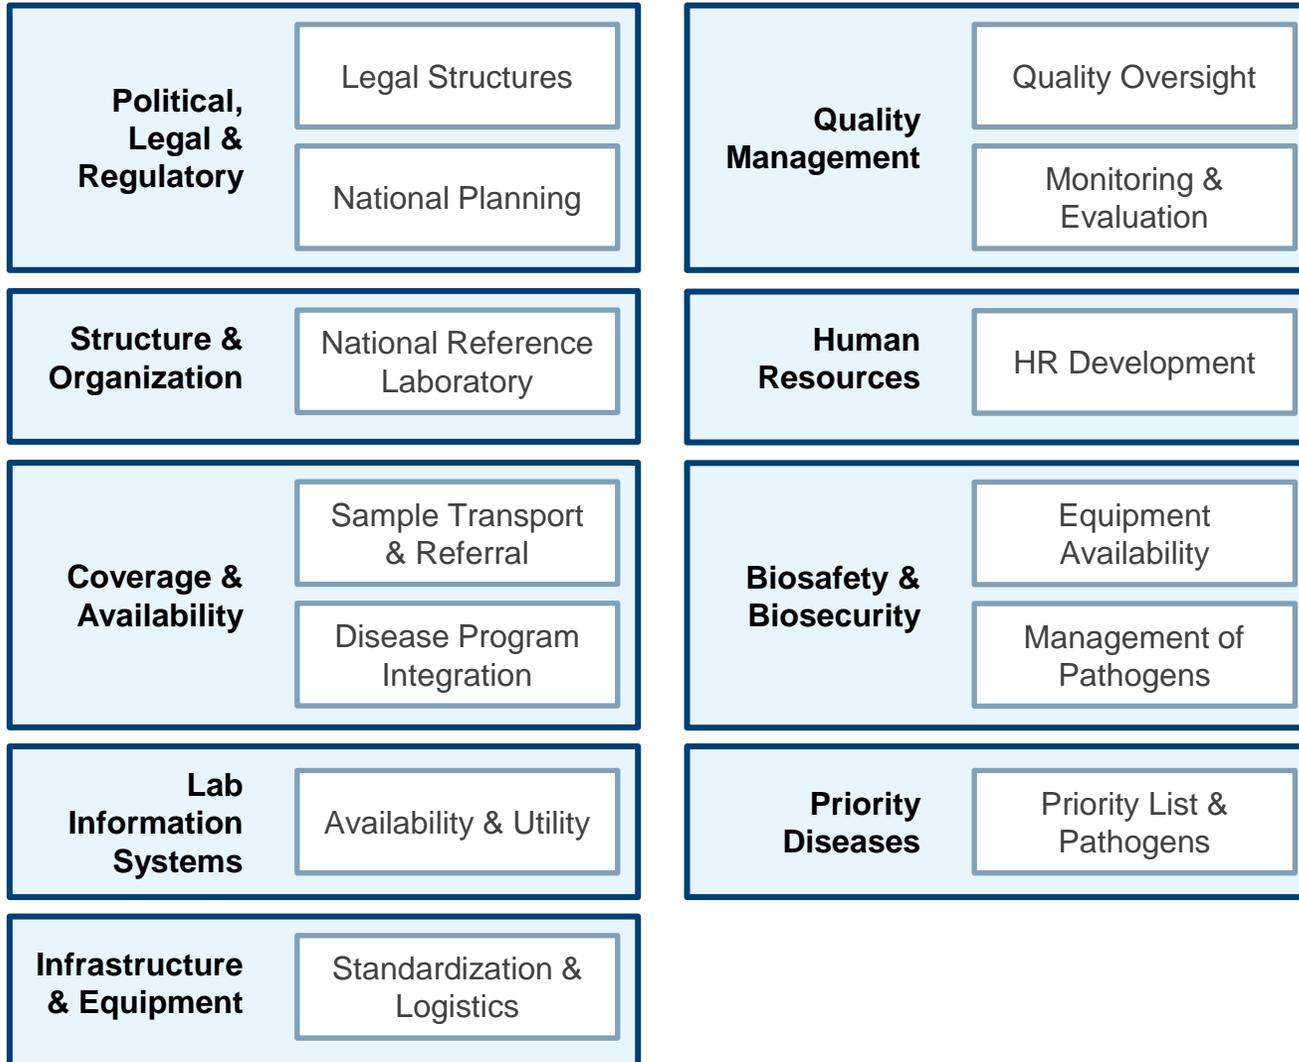

With resulting outputs **under-leveraged** due to **insufficient downstream utility** of the tools

? Milestones and core functionalities do not detail the **steps required** to drive system readiness forward

Readiness-based approach: 9 Lab Readiness System Core Capabilities

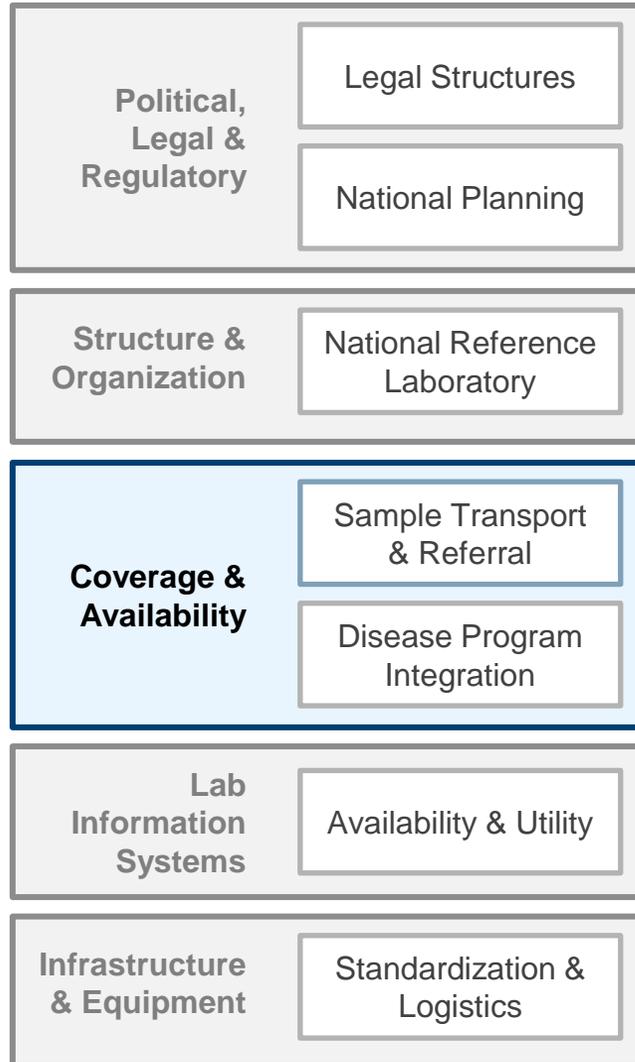

Capabilities Assessment

Building blocks to guide the stepwise implementation of laboratory capability to prevent, detect and act upon existing and emerging diseases.

Readiness-based approach

Capabilities Assessment

Capability Questions

Are all disease program laboratory services fully integrated at sub-national level?

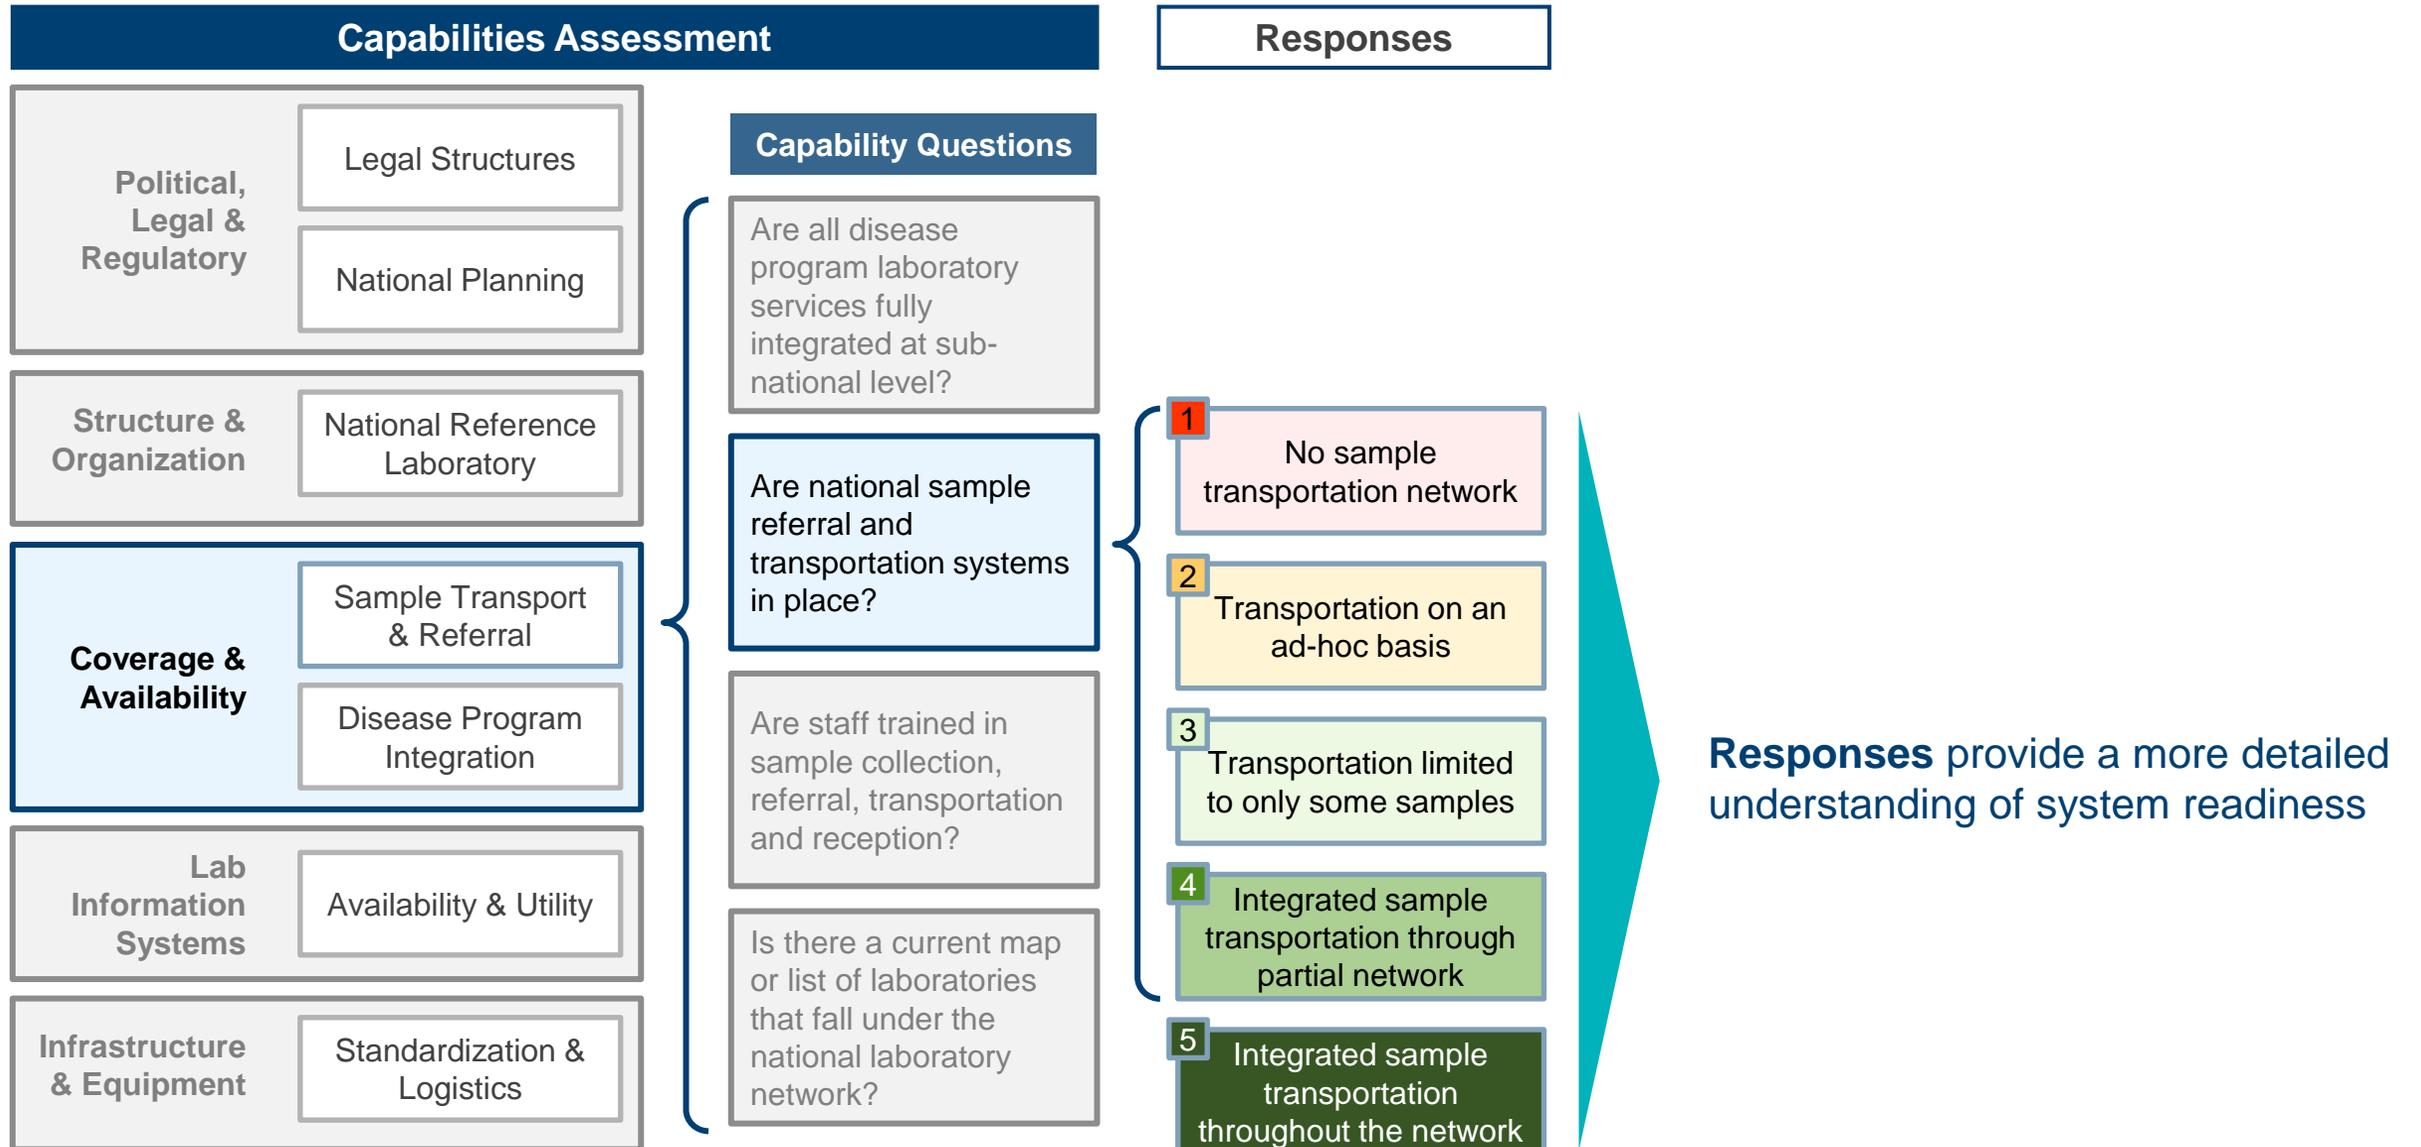

Are national sample referral and transportation systems in place?

Are staff trained in sample collection, referral, transportation and reception?

Is there a current map or list of laboratories that fall under the national laboratory network?

Questions are intended to generate a broad range of information, characterizing Coverage & Availability...

Readiness-based approach

Readiness-based approach

Capabilities Assessment

Political, Legal & Regulatory

- Legal Structures
- National Planning

Structure & Organization

- National Reference Laboratory

Coverage & Availability

- Sample Transport & Referral
- Disease Program Integration

Lab Information Systems

- Availability & Utility

Infrastructure & Equipment

- Standardization & Logistics

Capability Questions

Are all disease program laboratory services fully integrated at sub-national level?

Are national sample referral and transportation systems in place?

Are staff trained in sample collection, referral, transportation and reception?

Is there a current map or list of laboratories that fall under the national laboratory network?

Responses

1 No sample transportation network

2 Transportation on an ad-hoc basis

3 Transportation limited to only some samples

4 Integrated sample transportation through partial network

5 Integrated sample transportation throughout the network

Interventions

Develop a plan for a sample transportation network by analyzing the mapping of laboratories

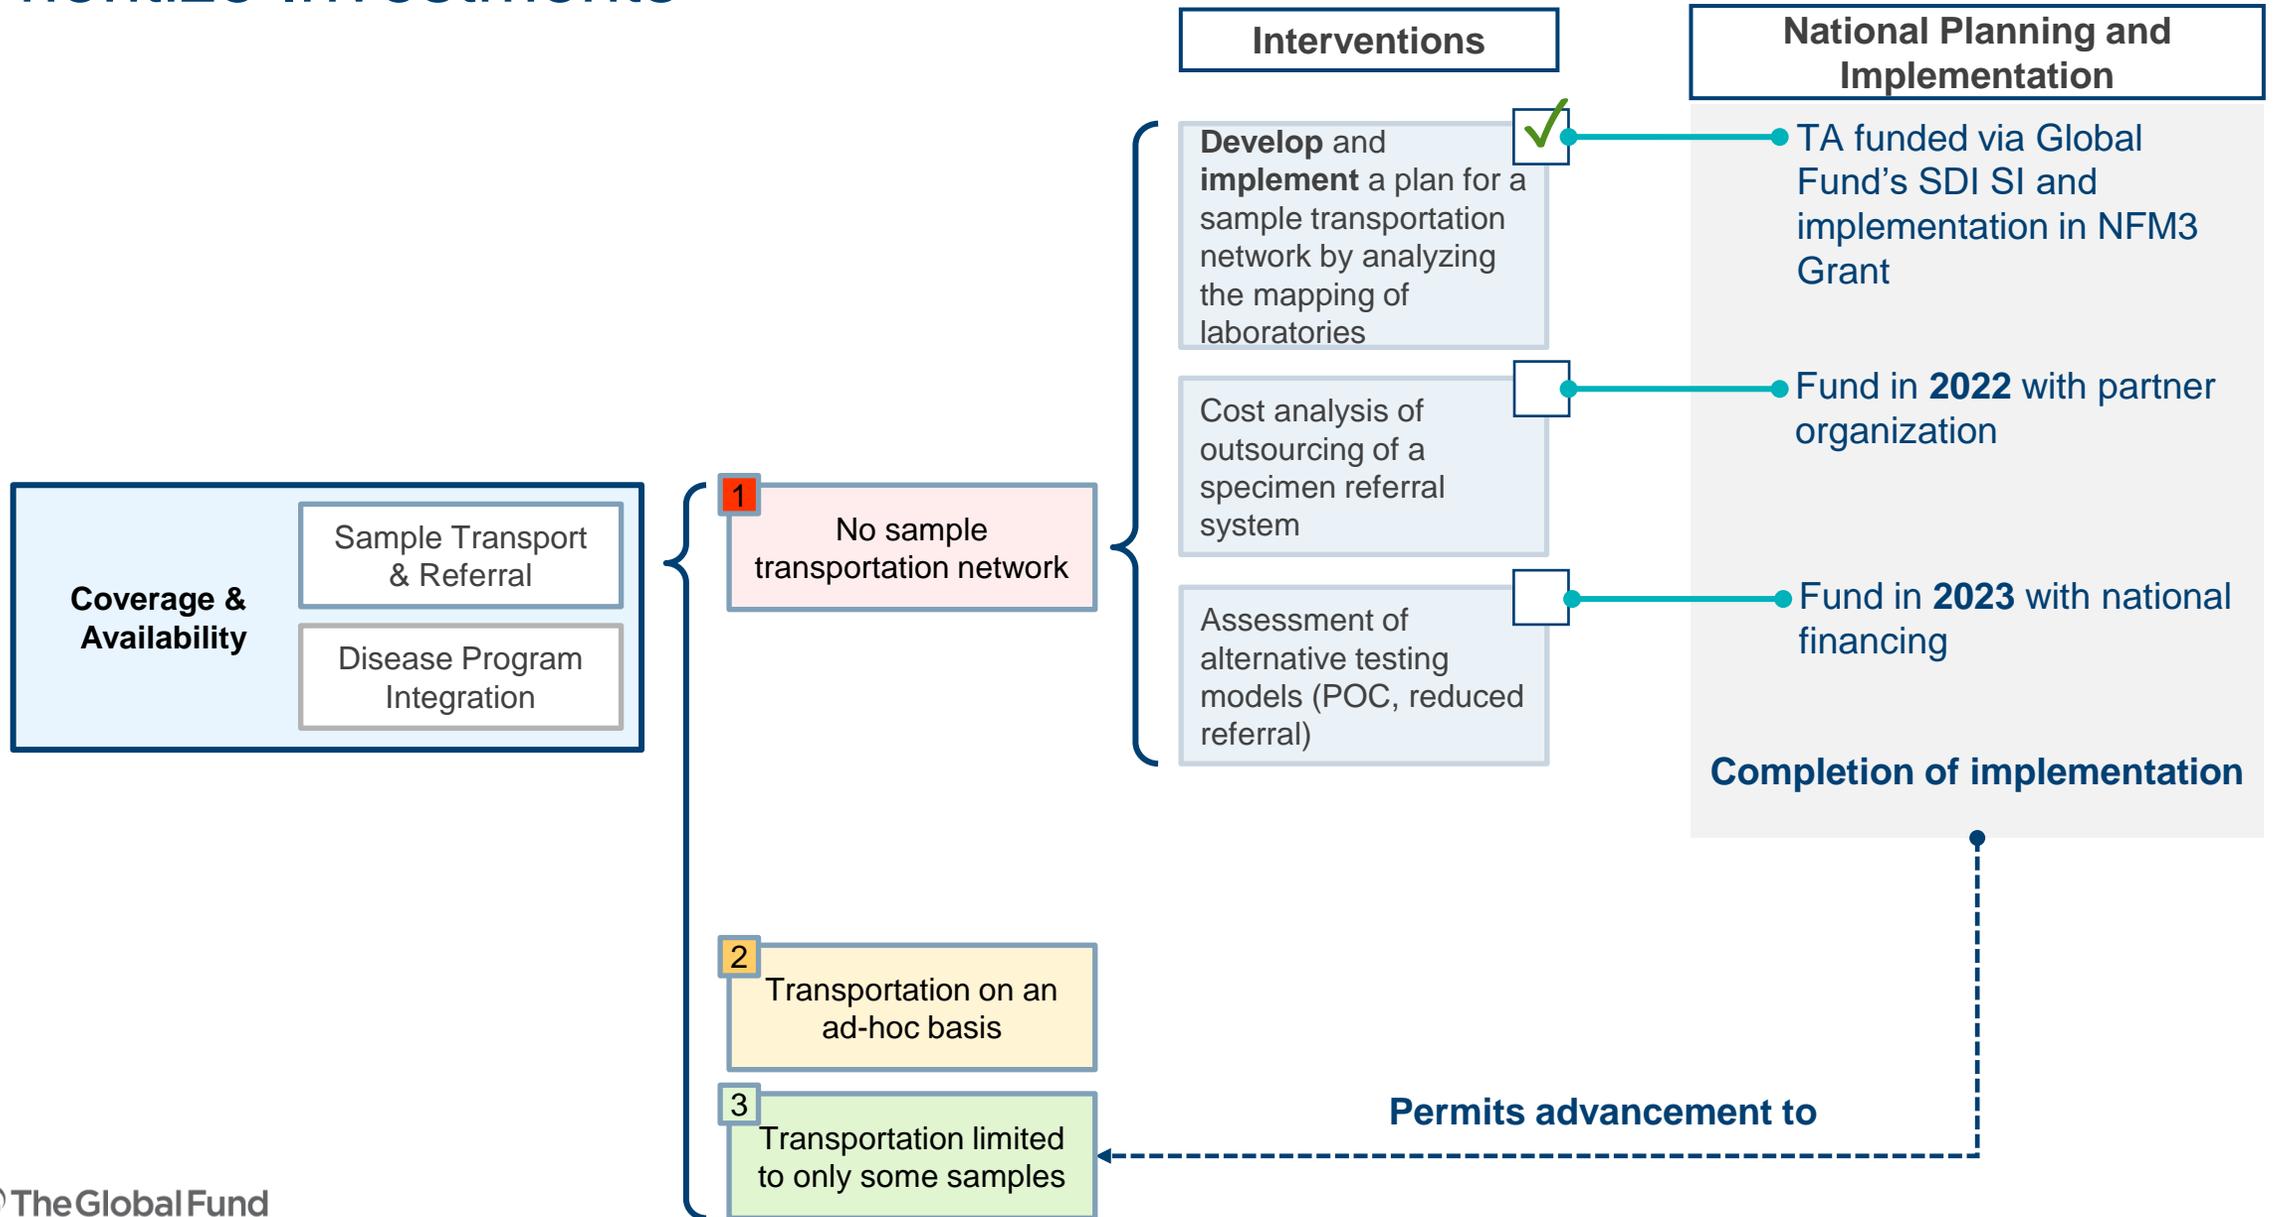

Cost analysis of outsourcing of a specimen referral system

Assessment of alternative testing models (POC, reduced referral)

Country and partner suggestion

Develop TORs

Prioritize Investments

Integration to the RSSH Dashboard

	2021		2023	
Political, Legal & Regulatory	3		3	
Structure & Organization	1	NRL supported by GF Grant	2	
Coverage & Availability	2		2	
Lab Information Systems	2	New LIS adopted with support from Partner A	3	
Infrastructure & Equipment	3		3	Planned infrastructure upgrade financed via GF grant
Quality Management	1		1	⚠ Under invested
Human Resources	3		3	
Biosafety & Biosecurity	1	Biosafety cabinets purchased by MOH with GF support	2	Planned implementation of M&E Framework for biosafety
Priority Diseases	2		2	

Results will be integrated into the RSSH dashboard, generating more advanced and granular visibility over country investments
